Chalkis Shipyards Partners with MTIS to Propel Digital Transformation and Enhance Operational Efficiency

Chalkis Shipyards is pleased to announce a significant stride towards digital transformation, aimed at boosting end-to-end productivity through the adoption of cutting-edge technology. A landmark contract has been signed with MTIS to implement an all-in-one digital platform, utilizing a 360-degree approach to operations management. This strategic move is set to revolutionize the shipyard's operations, delivering substantial sustainability gains and operational efficiencies through smarter operation, production, and supply chain management.

The implementation of this advanced digital platform will enable real-time updates on vessel work progress, enhancing transparency and communication with clients. This initiative aligns with Chalkis Shipyards' commitment to leveraging technology to set new standards in the highly competitive shipbuilding industry, paving the way towards the digital shipyard of the future.

This transformation marks a pivotal moment for Chalkis Shipyards as it continues to lead the industry by embracing innovation and digitalization.

"We are excited about this partnership with MTIS, which represents a significant step forward in our digitalization journey," said Ashraf Bayoumi, CEO of Chalkis Shipyards. "This collaboration will not only enhance our operational capabilities but also ensure that we provide unparalleled service to our clients, setting a true course for leadership in the shipbuilding industry."

About Chalkis Shipyards
